

GENERAL INFORMATION	
Parameter name	Contaminated sites
Name of the layer in EGD Map Viewer	Contaminated sites, Bratislava
Original name of the layer uploaded to EGD database	PP14_SGIDS_contaminated_sites
Category	Limitation of use
definition	sites with confirmed or suspected waste, landfills and/or underground pollution generated from domestic, construction and/or industrial activities.
Harmonized unit	none
Relevance for shallow geothermal energy	sites with confirmed or suspected waste, landfills and/or underground pollution generated from domestic, construction and/or industrial activities that may have an impact on the installation of shallow geothermal energy systems .
Data type	Discrete labels
Data format	vector: polygons
Projection	EPSG: 3034
Dataset selected for pilot area	Bratislava, Brussels, Zagreb, Cork

ATTRIBUTES	
class	Discrete data classes based on a joint legend:
1.	Contaminated site
2.	Potentially contaminated site
class_URI	Definitions of the attributes, e.g., INSPIRE, project vocabulary, etc.
linkdataurl	Link to data or additional information about the data, e.g., link to national databases (text)
remark	Free text for additional information (text)
repositoryurl	Link to this factsheet (text)

DATA SOURCE	
Pilot area	Bratislava
Data source	https://www.geology.sk/maps-and-data/mapovy-portal/geofond-registries/landfills/?lang=en https://envirozataze.enviroportal.sk/verejnostdetailBC.aspx?Id_Zataz=161&Id_Zara_denie=1206

Explanatory text English

The dataset contains areas with landfills from the archive of State Geological Institute of Dionyz Stur (Geofond) registry of waste dumps, as well as environmental burdens from the register of contaminated sites of Slovak republic, Slovak Environment Agency

(<https://envirozataze.enviroportal.sk/>)

The dataset extends over Slovakia and partly over Austria due to a presence of transboundary aquifers.

Explanatory text national language

Language

Slovak

Dataset obsahuje územia so skládkami z registru zaevidovaných skládok odpadov archívu ŠGÚDŠ (Geofond) a tiež kontaminované územia z Registra environmentálnych záťaží SR, Slovenská agentúra životného prostredia

(<https://envirozataze.enviroportal.sk/>)

Kvôli výskytu cezhraničných zvodnencov sa dataset rozprestiera na území dvoch štátov, Slovenska a Rakúska.
